

Stitch Witchery®

Fusible Bonding Web

Features

- Fusible web that permanently bonds two layers of fabric together when activated by a steam iron
- Washable and dry cleanable
- Available in black or white

Uses

- Creating no-sew hems in garments and home décor projects
- Applying ribbons and trims
- Making no-sew straps and belts

Weights

- Ultra Light - For sheers and lightweight fabrics
- Regular Weight - Suitable for light to medium weight fabrics
- Super Weight - Best for use on denim and home décor fabrics

Tips

- Use black Stitch Witchery to create an invisible bond on black sheers and dark fabrics.
- Be sure to check hems for correct placement and position before fusing.
- Use Hot Iron Cleaner to remove any Stitch Witchery residue from the bottom of iron.

TackyFuse

Paper-Backed Fusible Adhesive

Features

A paper-backed adhesive
Tacky surface maintains correct position until ironed. Once ironed, position is permanent
Machine washable

Uses

Ideal for no-sew projects and crafts
Fuse fabric to fabric, or fuse lace, ribbon and trims to fabric

Tips

Always pre-wash all fabrics before fusing
Do not use fabric softeners or dry clean
Use medium heat to fuse. Increase ironing time when ironing through multiple layers of fabric or when fusing heavier fabrics

RES-Q TAPE™

Double-Sided Clear Adhesive Tape

Features

A double-sided adhesive tape that clings to skin, fabric, paper and leather
Leaves no residue

Uses

A double-sided adhesive tape that clings to skin, fabric, paper and leather
Leaves no residue

Tips

Do not stitch through tape
Remove before washing or dry cleaning

InnerFuse™

Double-Sided Stiff Fusible Interfacing

Features

A structural interfacing with fusible adhesive on both sides for quick and easy projects
Provides both stiffness and flexibility
Ideal for flat as well as dimensional projects
Suitable for fabric and paper
Available in medium or heavy weight

Uses

Fabric bowls, boxes and vases
Purses and hats
Placemats, lampshades and window décor
Paper projects and scrapbooking

Tips

Fuse fabric to one side; flip over interfacing and fuse fabric to opposite side. Use a press cloth to prevent scorching your fabric.
Pin pieces and layers together using long flat flower head pins.

Fray Check™ Liquid Seam Sealant

Features

- A colorless plastic solution designed to reinforce and prevent the fraying of woven edges
- Fine tip on bottle provides controlled applications
- Washable and dry cleanable

Uses

- Use to finish fabric edges, ribbons and lace
- Secures thread ends on serged items
- Strengthens button threads and reinforces buttonholes
- Prevents fraying on seam allowances
- Controls runs in pantyhose

Tips

- Fray Check will not discolor or stain most fabrics.
- Always test first to be sure.*
- Puncture tip with a fine straight pin. *Do not cut tip with scissors.*
- Liquid will flow out of bottle when gently squeezed.

Spray Adhesive

Temporary Spray for Bonding Fabric or Paper

Features

- Eliminates basting and pinning
- Odorless and colorless
- Acid free
- Will not gum up hand and machine needles
- Repositionable for fabric and paper

Uses

Sewing

- Secures tissue patterns to fabric while cutting
- Temporarily holds garment hems in place when determining desired length

Quilting

- Bastes quilt layers together without pins
- Holds pieces in place when arranging quilt blocks on design wall
- Secures paper to fabric for appliqué patterns, paper piecing and machine quilting
- Holds stencils and templates in position

Appliqué & Embroidery

- Aids in positioning trims and appliques for hand or machine stitching
- Secures tear-away stabilizers to fabric for machine embroidery
